Damstra has completed SOC2 compliance

We at [Damstra Technology](#), a leader in Workplace Management Solutions for industries where safety and compliance are of utmost importance, are pleased to announce today that we have completed our Service Organisation Compliance (SOC 2), established by the American Institute of CPA's. SOC 2 outlines standards for the management of customer data using 5 trust service principles.

Security The protection of system resources against unauthorised access Network /application firewalls, Intrusion detection

Availability The accessibility of the system, products or services as stipulated by a contract or a service level agreement (SLA) Performance Monitoring, Disaster Recovery, Security incident handling

Processing Integrity Data processing must be complete, valid, accurate, timely & authorised. Quality Assurance, Processing monitoring

Confidentiality Access and disclosure is restricted to a specified set of people or organisations. Encryption, Access Controls, Network/application firewalls

Privacy The system's collection, use, retention, disclosure and disposal of personal information Access control, Encryption

This is the latest step in Damstra's ongoing commitment in providing the highest standard of information security for its clients.
